

FFY 2024 Annual Listing of Obligated Projects

Purpose

Title 23 Code of Federal Regulations (CFR) Part 450.334 outlines the requirement for Metropolitan Planning Organizations (MPOs) to publish an annual listing of projects for which funds have been obligated in the preceding year, including a listing of pedestrian and bicycle projects. From the Fixing America's Surface Transportation (FAST) Act, 23 U.S.C. 134(j)(7)(B), 23 U.S.C. 135(g)(5)(B), 49 U.S.C. 5303(j)(7)(B), and 49 U.S.C. 5304(g)(5)(B), the requirement is as follows:

"An Annual Listing of projects, including investments in pedestrian walkways and bicycle transportation facilities, for which federal funds have been obligated in the preceding year, shall be published or otherwise made available by the cooperative effort of the State, transit operator, and metropolitan planning organization for public review. This listing shall be consistent with the funding categories identified in each metropolitan transportation improvement program."

This report is published in response to the above requirement by listing all federally funded transportation projects in the Sacramento Area Council of Governments (SACOG) region that were obligated during federal fiscal year 2024. Obligation refers to the federal government's commitment to pay or reimburse the lead agency for the federal share of a project's cost. Obligation does not indicate expenditure or project completion; only that the project has been approved for federal reimbursement.

The Metropolitan Transportation Improvement Program

As the designated MPO for the region, SACOG also prepares and maintains the Metropolitan Transportation Improvement Program (MTIP, the short-term (four-year) planning document. The MTIP lists all transportation-related projects requiring federal funding or other approval by federal transportation agencies. It also lists non-federal, regionally significant projects for information and air quality modeling purposes.

The projects included in the MTIP are consistent with SACOG's Metropolitan Transportation Plan (MTP) and are part of the area's overall strategy for providing mobility, congestion relief, and reduction of transportation-related air pollution, which supports efforts to attain federal air quality standards for the region.

Public Involvement

SACOG aims to proactively engage the public in the regional transportation planning process and embrace federal requirements that MPOs provide the public with complete

information, timely public notice, full public access to key decisions, and early and continuing involvement in developing the MTIP, MTP, and other products.

Annual Listing of Projects with Federal Funding for Federal Fiscal Year 2024

Federal law requires SACOG to publish for public review an annual listing of projects for which federal funds have been obligated in the preceding year, as a record of project delivery and a progress report for public information and disclosure.

This report is divided into the funding types administered by the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA). Projects are listed by Lead Agency, MTIP Program, Federal ID, and SACOG ID. The SACOG ID number is a unique project identifier used in the MTIP. Multiple Federal IDs can correspond with one SACOG ID. Please note that this list includes only federal funds that were obligated; no state or local funds are reported. The information contained in this report was provided by the California Department of Transportation (Caltrans).
